Description

Level: High

This training unit focuses on step-by-step development of an initial action in outnumbered situations with a positional change from the center back position player to the 6-meter line (second pivot). Following warm-up and a short game, the running and passing paths for the initial action are introduced during the ball familiarization and goalkeeper warm-up shooting phases. During the subsequent attack exercises, the players develop several shooting options which they eventually implement in the closing game.
