Description

Level: High

The objective of this training unit is to improve free play in fast break situations. Following warm-up and a short game, the players play long passes during the ball familiarization phase which will be further developed in the goalkeeper warm-up shooting exercise. This is followed by a series of shots requiring precise passes. Afterwards, the players practice free play in outnumbered, open situations during fast breaks. A closing game with gradually increasing complexity completes this training unit.
